

INFANT FOREST SCHOOL POND RENOVATION FEBRUARY 2024 - FUNDED BY THE HSA

The HSA are very proud to have been able to facilitate this very special school request.

The pond area was aged and not able to be utilised by the school. The children enjoy forest school so much this seemed like an ideal time for us to take on the project that needed the time and money the school simply didn't have.

It has been an absolute pleasure for the HSA and a supportive team to be able to bring this area back to life and make it such a great space for the children to enjoy.

This is a fantastic example of what a bit of money and a big team effort can achieve.

We are so happy to be able to give this area back over to the school with its much needed upgrade.

A HUGE THANK YOU TO: Ash Halls, a parent of the school, who utilised his building firm (plus gave up his own time) to get this whole project off the ground and completed. **Kirsty Rennie**, another parent of the School, who runs a local gardening and garden design business, kindly gave her time to get the pond itself back to life. Thanks also to **PR Builders** for their contributions of materials which helped keep the costs down. Plus with some willing helpers of all ages to assist, this was a great team effort and allows the space to be used once again.
